SUMMARY

I am a software developer who enjoys understanding real-world problems and building practical solutions that make work easier. I have experience developing web applications and digital and backend systems for business and healthcare operations, from designing databases to building user interfaces and improving existing workflows.

I enjoy learning how systems work, solving problems and working with people to turn ideas into useful applications. My background in Medical Engineering Technology also gives me an understanding of healthcare environments and their needs.

EXPERIENCE

Software Developer | Gonepharm

August 2025 – Present

- Built and deployed digital applications for business and laboratory equipment.
- Developed systems for managing records, daily activities and internal operations.
- Worked on integrating software with equipment for laboratory and Clinic-at-Hand workflows.
- Automated compliance reporting, reducing manual work by over 67.4%.
- Improved existing systems and digitised manual processes.
- Contributed to technical planning, system development and product delivery.

Backend Developer | OnlineMedic Healthcare

November 2024 – March 2025

- Developed backend features for healthcare applications using Python and Django.
- Built services connecting application features with databases.
- Worked on document processing, data extraction and automation.
- Integrated backend services with React-based interfaces.

Independent Software Developer | Freelance Projects

2022 – Present

- Developed websites and web applications for businesses, examples including Ledanie Construction and Nova Children's Therapies.
- Built e-commerce platforms and business management systems.

- Developed applications based on client requirements.
- Managed development, database setup, integrations and deployment.

Kenyatta University Teaching, Referral and Research Hospital (KUTRRH)
Biomedical Engineering Technologist | March 2024 – May 2024

Thika Level 5 Hospital
Biomedical Engineering Technologist | November 2023 – January 2024

- Supported medical equipment maintenance, troubleshooting and testing.
- Assisted with technical documentation and equipment reliability.

PROJECTS

Business & Web Applications

- Nova Children's Therapies – Responsive business website.
- Ledanie Construction – Company website and service presentation.
- Gonepharm – Corporate website.
- Gonepharm Plus – Web application.

Backend & Business Systems

- Bulk SMS System – Bulk messaging platform.
- Multi-Tenant SMS System – Multi-tenant messaging application.
- Inventory & Client Management – Business management system.
- E-Commerce Platform – Online shopping application.

Healthcare & Integrated Systems

- Clinic-at-Hand Lab System – Hardware and software integration for a Hospital Clinical Analyser Machine.
- Symptom Checker – AI-assisted health information application.

Additional Projects

- AI Chatbot
- Kejani House Finder – House hunting app.
- Business Central Practice Project - AL Book Management
- Card Imposer

EDUCATION

Diploma in Medical Engineering Technology
Kenya Medical Training College (KMTC)
Awarded December 2024

SOFT SKILLS

- Team leadership and coordination
- Project planning and task management
- Problem-solving and critical thinking
- Communication and collaboration
- Requirements gathering and user-focused development
- Decision-making and initiative
- Time management and organisation
- Adaptability and continuous learning
- Working with technical and non-technical teams
- Accountability and independent working

TECHNICAL SKILLS

- PHP, Python, JavaScript, HTML, CSS, Tailwind CSS, Typescript.
- Laravel, React, Next.js, Django, FastAPI, Node.js.
- REST API development, API integration, authentication and backend architecture.
- PostgreSQL, MySQL, SQLite.
- Git, GitHub, GitHub Actions, cloud deployment.
- Workflow automation, device integration and technical documentation.

REFEREES

Available upon request.
