PROFESSIONAL SUMMARY

I am a software developer who enjoys understanding real-world problems and building practical solutions that make work easier. I have experience developing web applications and digital systems for business and healthcare operations, from designing databases to building user interfaces and improving existing workflows.

I enjoy learning how systems work, solving problems and working with people to turn ideas into useful applications. My background in Medical Engineering Technology also gives me an understanding of healthcare environments and their needs.

TECHNICAL SKILLS

Programming: Python, JavaScript, HTML, CSS.

Frameworks: Django, Flask, FastAPI, React, Next.js.

Databases: PostgreSQL, MySQL, SQLite, Firebase.

Tools and Other Skills: Git, Linux, API integration, cloud deployment, workflow automation and AI integration.

SOFT SKILLS

- Team leadership and coordination
- Project planning and task management
- Problem-solving and critical thinking
- Communication and collaboration
- Requirements gathering and understanding user needs
- Decision-making and taking initiative
- Time management and organisation
- Adaptability and continuous learning
- Working with technical and non-technical teams
- Accountability and independent working

PROFESSIONAL EXPERIENCE

Software Developer | Gonepharm

August 2025 – September 2026

- Built and deployed digital applications for business and laboratory operations.
- Developed systems to manage records, daily activities and internal workflows.
- Worked on connecting software with equipment for laboratory and Clinic-at-Hand workflows.
- Automated compliance reporting, reducing manual work by over 67%.
- Improved existing systems and helped move manual processes into digital workflows.

Backend Developer | OnlineMedic Healthcare

November 2024 – March 2025

- Developed backend features for healthcare applications using Python and Django.
- Built services that connected application features with databases.
- Worked on document processing, data extraction and automation.
- Connected backend features with React-based interfaces.

Independent Software Developer | Freelance Projects

2022 – Present

- Developed websites and web applications for businesses, including Ledanie Construction, Nova Children's Therapies.
- Built e-commerce and management systems.
- Built application features based on client needs.
- Handled development, database setup, integrations and deployment.

SELECTED BIOMEDICAL EXPERIENCE

Kenyatta University Teaching, Referral and Research Hospital (KUTRRH) | Biomedical Engineering Technologist
March 2024 – May 2024

Thika Level 5 Hospital | Biomedical Engineering Technologist
November 2023 – January 2024

Supported medical equipment maintenance, troubleshooting, testing and technical documentation.

EDUCATION

Diploma in Medical Engineering Technology
Kenya Medical Training College (KMTC)
Awarded December 2024

PROJECTS AND PORTFOLIO

Portfolio: https://scriptedsyntax.github.io/myportfolio

GitHub: https://github.com/scriptedSyntax

Selected work includes business applications, healthcare systems and websites developed for practical use.
